

Cubbit is hiring

Job Offer **DevOps** Full time

Info: careers@cubbit.io

About Cubbit

At Cubbit we envision a new internet: green, privacy-friendly, safe, with no one in control. We're building the first distributed data center, made by the users for the users. Started with a successful Kickstarter campaign, our vision is contagious: indeed, Cubbit is growing fast all over the world and is going to double the team in the next months.

We collaborate with partners such as CERN, Samsung, TIM, and Masmovil. Our distributed cloud technology has been presented as an excellence in several scientific and technological conferences. Also, we are part of a EU-wide project to renovate the cloud infrastructure for science.

Cubbit is a hi-tech, distributed cloud startup. Headquartered in Bologna, Italy, with a branch in Tel Aviv, Israel, Cubbit counts Techstars and Barclays among its global-class shareholders.

Job Description

We not only apply cutting-edge technology. We create it. We are looking for an excellent software engineer with proven outstanding technical and analytical capabilities and the ability to get the job done within specified deadlines and requirements. The candidate must be comfortable working in a team of widely-recognized top class developers as well as independently when needed.

Please apply even if your experience isn't an exact match with what we've laid out in this job description. We're building something different at Cubbit. If that sounds interesting, we want to hear from you.

What you'll do:

- Automate the configuration management and provisioning environment
- Enhance metrics-gathering and monitoring of the environment
- Develop, test and maintain build and deployment scripts in CI/CD framework/tools to automate and streamline deployment processes.
- Perform deployments, merges and updates.
- Improve operational efficiency by automating manual tasks

Your Profile and Mindset:

- Proven ability to solve conceptual problems in collaboration with the entire team.
- Obsessive attention to details.
- Positive attitude towards problem solving
- Obsession with automation and simplicity.
- Drive to get things done.
- Willingness to learn.
- Strong analytical and critical thinking.

What you'll need

- Git
- Shell scripting
- Docker
- AWS
- CI/CD
- Microservices
- Jenkins
- Linux

Bonus points:

- Service discovery
- Kubernetes
- Bazel
- Terraform
- Passionate about building and fostering good engineering practices and processes.
- Experience in international environments
- Experience in managing other people
- 3+ years' seniority
- Solid spoken and written english communication skills
- Positive attitude towards problem solving
- Obsession with automation and simplicity
- Drive to get things done
- Willingness to learn
- Experience with software development life cycle processes or Agile development, including Scrum, rapid prototyping, or a similar rapid development environment

Benefits:

- A vibrant, young, and informal workplace.
- Remote work possible after 6 months working with the team.
- Opportunity to participate in the best world fairs and events linked to the tech world.
- Possibility to move in different countries during your career.

Location, Commitment & Contract

Heart of Bologna, city famous for food, warm, and young people as well as great life style. Less than 2 hours from the nicest places in Italy: lakes, Tuscany, Venice etc.

The type of contract will be defined together with the founders.

If you're a hard worker, an inspiring leader, a humble team player, and a dreamer at heart, Cubbit is the place you are looking for.

Contacts
