About Cubbit

At Cubbit we envision a new internet: privacy-first, green, accessible, with no one in control.

To get there, we are on a mission to recycle the internet resources we waste into the most competitive & cybersecure web services.

We're building the world's **1st distributed cloud provider**, that needs no costly and polluting data-centers to run.

The first step is disrupting cloud storage for users, and we started with a Kickstarter launch that got into the **top 1% of most funded campaigns in history**.

Then, we are bringing cloud storage for businesses to the next level, by making privacy a right and not a premium feature.

It's not only about cloud storage, though. Hosting, VPN, CDN, distributed cloud computing will follow soon. We're building all this together with our world-class partners such as **Techstars, Barclays and the European Commission**.

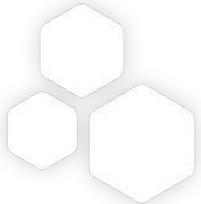

Headquarters: Bologna, Italy w/ a branch in Tel Aviv, Israel.
